Delaware T²/LTAP Center

Asphalt Construction
Best Construction Practices

Training Workshop

October 12, 2021
8:30 a.m. to 12:30 p.m.

Location:
St. Jones Reserve
Delaware National Estuarine Research Reserve (DNERR)
818 Kitts Hummock Road, Dover, DE 19901

Workshop Overview:
Do it right the first time. Often, that's easier said than done, but we are expected to build high quality asphalt pavements and the good news is that we can. Like many other examples, the construction practices we employ can be a determinant factor in how well and how long our pavements perform for us.

This workshop is basic and intended for those with minimal or even no experience with asphalt construction. However, those with greater experience are welcome to attend and contribute to the discussion.

Topics will include: contract management, pre-construction meetings, preparation, materials, transport, placement, compaction, inspection, and safety. We will also discuss the common pavement distresses we are looking to minimize and relate them to the best practices we are discussing.

Notice: COVID-19 protocols that are in place with the State of Delaware at the time of the workshop will be observed and we ask all participants to be respectful of physical spacing needs of others.

Instructor: Matheu J. Carter, P.E.

Registration: Electronically here. We will confirm registrations approximately two weeks before the workshop. Because space is limited to 30 participants, the T²/LTAP Center will allocate seats to as many different agencies as possible.

Fees: State, local, and federal transportation agency employees – FREE
Private sector (consultants, contractors, vendors, etc.) - $50

Refreshments: None will be provided.

Parking: On-site parking is free.

Directions: Please visit the website for directions to the facility.

If you need more information, please contact the Delaware T²/LTAP Center at 302-831-4094.
