

**Devon Bond**  
**Engineer**  
**Terumo Cardiovascular Group**

Devon Bond earned a BS in Biomedical Engineering from the University of Delaware in January 2014. She was part of the first graduating class of the Biomedical Engineering program. After graduation, Devon began working as an engineer with Terumo Cardiovascular Group in Elkton, MD. She played a key role in the acquisition and product design transfer of Off Pump Coronary Artery Bypass (or Beating Heart) technology used in cardiovascular surgery. In addition, Devon has recently joined the Profit Engineering team. She is currently leading three projects that total over \$1.5 million in annual savings.
