

Women's Cardiovascular
Research Laboratory

STAR Campus, 540 S College Ave, Newark DE 19713

**We are researching how heart disease
affects women's health
by examining blood vessel function.**

Did you know heart disease is the
leading cause of death in women?

Help us complete our research

By participating in one of our studies

Find us online: www.sites.udel.edu/chs-wcrl

You may be able to participate if you are a female

- Peri-Menopausal: (experiencing fluctuating or absent cycles) and do not use hormone therapy

- Has normal blood pressure and BMI
- No history of heart disease or diabetes
- Not using an extended cycle pill or IUD
- Not using tobacco

Contact us to learn about how you can participate!
