It will enhance your knowledge of how people learn and expand and diversify your toolbox of teaching methods. The seminar is designed for you to learn from readings, activities, reflections, feedback, and colleagues. It is geared toward your having a few usable products. These include: 1) a teaching philosophy that is informed by theories about learning and teaching and assessment practices with which you are comfortable; 2) an approach to creating assignments that reflects your understanding of key concepts in your discipline and 3) a framework for developing learning experiences appropriate to your discipline.
